1. Regarding the IDSs filed March 20, 2000 (Paper No. 2) and March 16, 2001 (Paper No. 7), copies of most the references listed thereon are located in the various parent applications. It is noted that copies of a few of these references have been provided in the instant application. The parent applications are currently unavailable to the examiner. Consequently, the only citations that have been initialed correspond to the copies that have been provided in the instant application. The examiner will consider the rest of the references when they become available.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

(f) he did not himself invent the subject matter sought to be patented.

3. Claims 7 and 13 are rejected under 35 U.S.C. 102(e) as being anticipated by Hauser.

Hauser discloses an apparatus having the structure as claimed. The apparatus includes a housing 11, an HST 10, axles 18, bevel and pinion gears (i.e. near element 17), and a ring gear 53.

Art Unit: 3611

4. Claims 7 and 13 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Nemoto '820.

Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

5. Claims 7 and 13 are rejected under 35 U.S.C. 102(f) because the applicant did not invent the claimed subject matter.

In view of the decision in Patent Interference No. 104,311, it is determined that applicant did not invent the claimed subject matter such as the gearing arrangement.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel G. DePumpo whose telephone number is (703) 308-1113.
